

## APES14

Paper/Ejector/Stacker

### Description

Improve your Rhin-O-Tuff Punch investment by adding the APES 14 (Automatic Paper Eject System) to your HD7000 and you will increase your punching capabilities by an amazing 34%. With the APES 14 attached, simply insert your paper into the punch where it is automatically punched and ejected out and into the APES reception unit, where it is neatly stacked, leaving you free to take the next batch of paper for punching. With the APES system, you can punch paper sizes between 140mm x 140mm and 356mm x 356mm. For the occasional job that falls outside these parameters, the HD7000 can be used in standard mode with the APES system still attached.

**PLEASE NOTE:** The above image is the APES14 attached to the HD7000.

### Features and Benefits

- Punches, ejects and stacks in one continuous operation.
- Increases punching output without a large capital outlay.
- Increases productivity up to 34% without the hiring of additional help.
- Handles paper sizes from 140mm x 140mm to 356mm x 356mm.
- Simple to install and operate.

### Technical Specification

Dimensions (mm):	H 381 x W 965 x D 660
Weight:	24.9 Kgs
Power Requirements:	230v 50Hz 1.5amps
Method of Operation:	Switch
Safety Approvals:	CE/TUV
