230 sheets of 80gsm

coil binding

Coil/Spiral binding is the most exciting and fastest growing style of document presentation in the United Kingdom. It is very simple to apply and provides a highly effective and professional style of binding for documents of all types. The whole process is quick and easy and making amendments is just as straightforward. Below are the key strengths and benefits to using coil/spiral binding.

Practical

Plastikoil production is both quicker and simpler than Wire, Comb or Velo and is available in a selection of diameters, from 6mm to 33mm.

Strong

Plastikoil Binding is virtually indestructible, if crushed it will simply spring back into shape. This feature makes coil ideal for posting and heavy usage applications.

Colourful

Colour plays a vitally important role within our lives and is a powerful form of communication. Plastikoil is available in 45 colours but can also be produced to match your corporate colours.

Durable

Coil bound documents will last longer, sustain less damage or wear than Wire, Comb or Velo binding. The unique spiral binding elements will never allow pages to fall out.

Flexible

Plastikoil binding is suited to all environments and applications, and is available as standard A4 and A5 lengths but can be produced in any length up to one metre.

If you would like to find out more please call 020 8810 5770 or www.coilbinding.co.uk
